dpsk high performance street clutches

DPK OFF-ROAD CLUTCH KITS

The **DPK CLUTCH KITS** have been designed to provide extended service life coupled with super smooth power delivery. Each kit includes friction plates, steel drive plates and clutch springs. The friction plates are ready to race with no need to soak in oil. They are more durable than original equipment and the high heat friction material provides fade-free performance.

DPK Clutch Kits contain friction plates, steel plates and springs

CRYOGENICALLY FROZEN 410 STAINLESS ROTORS.

Processing at -195°C (-319°F) changes the structure of the metal giving a closer molecular bond. This increases wear resistance and gives a longer service life and creates a more stable material with fewer inherent stress points. You can expect a service life up to 3x that of a non-treated rotor and one that copes much better with the hot/cold heat cycle associated with disc brakes.

Brakes pads should be fitted by experienced mechanics in accordance with the motorcycle manufacturer's service manual. New pads require bedding-in (80% contact area) before maximum performance is achieved. This may take up to 150 miles (250kms). Until then use brakes gently, only braking severely in an emergency. Replace pads when thickness of material reaches 2mm.

Aftermarket Discs/Rotors
